

FINANCE AND MINING.

State of the Money Market and General Business.

ORE, BULLION AND MINES.

Business—Local Securities—Bank Receipts—Electricity in Mining—Gilmer and Salisbury's Mines.

Business during the week has been fair, the influx of fall freight has in a great measure ended, and from now on during the winter receipts at the railroads will be light. As we observed some time ago, the larger establishments have made no appreciable diminution in their fall purchases.

The money market is close as yet, but there is nothing existing that could be called a stringency. A prominent lender yesterday assured us that he was constantly making loans and that during the week he had put out some heavy amounts. One per cent to 1½ is paid with real estate security, but except on extremely large amounts, nothing lower than 1 is taken.

The Deseret National bank sent an order on Friday for 1000 shares of Horn Silver and the customer for whom it was bought was fortunate enough to obtain it at bed rock, \$4.25 per share.

Dealings in local securities have been scarce; a small block of Rocky Mountain Electric stock changed hands at \$15; a slight advance over the last transaction noted.

R. S. Watson, buyer for Z. C. M. L., has returned from New York, having left two days previous to the election; it is needless to state that he is a stalwart Republican; he says: "The feeling is general that if Cleveland goes in we will have flat times; still a good deal will depend upon whom he chooses as a cabinet; there are big factories east which are now working one-half their force until it shall be known whether or not Blaine is elected, and if he is not the fear of free trade will shut a good many down altogether."

Country merchants are referred to the article "Our Country Trade" in another column of this issue; they will find a careful estimate of many of their class, made by a writer who is as thoroughly conversant with the methods of business in Utah as any one within her borders.

Ore and Bullion.

The receipts of ore and bullion at the banks in this city for the week ending Saturday, November 15th, amounted to \$131,818.94 against \$142,115.68 for the week previous. The following are detailed tables of the receipts:

By Wells, Fargo & Co.	Value.
16 Cars Horn Silver bullion.....	\$48,000.00
5 Bars Vienna.....	7,608.00
36 Bars Ontario.....	29,310.94
2 Bars Christy.....	3,200.00
Total.....	\$88,118.94

By McCracken & Co.	Value.
13 Bars Hanauer.....	\$25,300.00
3 Cars Idaho ore.....	4,450.00
1 Car Nevada ore.....	1,950.00
1 Lot Crescent ore.....	2,600.00
6 Cars Queen of the Hills ore.....	6,950.00
2 Bars Stormont Silver.....	2,750.00
Total.....	\$43,700.00

Total shipments for the week \$131,818.94

The Sells.

Colonel Sells stated to a HERALD reporter on Friday, that he was about to close down his property in Alta, on account of the tramway's annual cessation of work. The Colonel stated that he had been able to clear expenses during the summer, and considering that the aim had mostly been to develop the property, he felt well satisfied with the result.

The Quigs.

Mr. Evans states that the mine is now looking better than ever before, and that Mr. Hirschman, the superintendent, is working a force of eleven men. One \$3,000 shipment has been made to Kansas City since the new organization took hold.

The Ontario.

The one hundred and first dividend of 50 cents per share—\$75,000—has been declared, and is payable on the 20th. No later quotations have been heard than that last recorded in THE HERALD of \$21.00 per share. This will make \$825,000 paid in dividends since January 1st, 1884.

The Latest Sensation.

In conversation with Mr. C. C. Rutledge, who keeps all the news of developments in electricity at his finger's ends, a HERALD reporter learned that H. J. Cassell of England has just perfected a process for working refractory gold ores by electricity. He used nascent chlorine, treated by electrolysis and also used common salt. Limerock was added to prevent a loss of other metals. Mr. Cassell experimented with his process six months, and when he demonstrated it successfully, the patent was bought by an English syndicate for \$300,000. The discovery has made a sensation among mining men abroad.

Gilmer and Salisbury's Mines.

The possessions of this firm are so vast and widely scattered that like those of Queen Victoria, it may be said the sun never sets upon them. Each one of the members comprising the firm—J. T. Gilmer, Monroe Salisbury and O. J. Salisbury—gives his attention to a property which taken singly would mean a fortune to any ordinary mortal.

silver bars alone will be shipped. Mr. Haines thinks that the bars, if the process proves satisfactory, will assay as high as 950 or 975 fine.

J. T. Gilmer is busy at the Kentuck on Salmon River, the company's gold mine. The mill is being constructed at a heavy expense, the machinery having to be hauled part of the distance from Dillon to the ground selected for its site.

Monroe Salisbury remains at Benson, Arizona, where he is running the Benson Smelting Works. The bullion turned out is shipped direct to San Francisco. The Stewart in Bingham still lies idle and neglected.

The Idahoan.

The English syndicate which purchased this property is working it actively, and shipping ore to Kansas City; sixty men are employed. Mr. G. Edgington, one of the brothers who sold the property, states that the first payment will be due at McCornick's bank on December 15th; the amount is \$150,000 and the remaining \$250,000 matures some time after in two equal payments.

An Important Decision.

The suit of Don Carlos Butterfield against William H. Henry for \$100,000, alleged commission for endeavoring to negotiate the sale of the famous Johnny Bull copper lode, in San Simon, N. M., belonging to Mr. Henry, ended recently in Part 2 of the Supreme court. The property has \$2,000,000 worth of ore in sight, which consists of gold, silver and copper. After hearing the testimony (taken by commission) of Butterfield, Baron Schultz and Captain Price of London, on motion of Jerome Buck, counsel for Mr. Henry, Judge Barrett dismissed the complaint. This is an important decision, as it was an attempt to collect a commission of \$100,000 on an alleged sale of the property for \$200,000 cash, when the vendor and the vendee were never brought in contact and when no money was tendered, or bond given to the broker. The property has attracted the attention of the London and New York mining exchanges for several years and the decision has been awaited with great interest. The ground upon which Judge Barrett dismissed the suit was that the plaintiff had failed to prove that he had provided a customer willing to pay \$200,000 for the property. Mr. Price in an affidavit which was submitted yesterday, stated that he had made no such offer to the plaintiff.—New York Mining Record.

Profits on Low Grade Ore.

About 600 tons of "low grade ore" is the average daily production from the mines on the Comstock and elsewhere in Storey County, Nevada. Of this, about 500 tons are daily shipped by the Virginia & Truckee Railroad to the mills on the Carson River. The Union Mill and Mining Company do nearly all the crushing, and charge \$9 per ton, giving a gross income of about \$4,500 per day to the mill-owners. The cost of reduction is estimated to be in the neighborhood of \$5 per ton, leaving a net profit of say \$2,500 per day.

This Year's Production.

The Director of the Mint estimates the production of mines in the United States during the calendar year 1884, at \$29,000,000 gold, and not quite \$2,000,000 more silver than for the previous year.

The Crescent.

Shipping is inactive, only one lot having been received at the bank during the past week. Stock is freely offered, but takers are few.

Horn Silver.

The decline in the stock noticed in our Commercial columns, is due, so we learned at the office, to the great amount of shares recently thrown upon the market. Whose stock this is, or why it is being realized upon, no one seemed to know.

Popularity of the Type-Writer.

Forty feminine manipulators of type-writing machines have been recently examined by the Civil Service Commission and they have just received notice of a grade to which their proficiency entitles them. It was the first examination of the kind and was altogether a curious exhibition. The exercises were read sentence by sentence by the examiner, and at each pause the fingers of forty women and girls would fly with almost lightning speed over forty machines. Some who were accustomed to write shorthand from dictation would catch the words while writing and finish the sentence nearly as soon as the examiner. This act of the Civil Service Commission is suggestive of the rapidity with which the typewriter is superseding all other forms of copying. Chiefs of divisions in the various departments are allowed clerks who have been used by stenographers. Now these are being supplanted by the combined stenographer and typewriter.—Philadelphia Times.

Paying a Bet.

On Tuesday, Mr. Lavin, who lost the bet with Mr. C. M. Brown, that Blaine would be elected, will take a monkey and hand organ and play six times on each of the four following corners of Main street: Godbe's, Jennings, Walker Bros. and A. C. Smith & Co's. The proceeds will go to the Sister's Hospital. After performing his duty, Mr. Lavin will proceed to the hospital, play six times there, then deliver over the proceeds of his grinding to one of the Sisters in charge.

A Long-Felt Want.

BROWN—"Ha, ha!" have hit it at last. Fortune smiles once more. Hooryay for—

BLACK—"Brown, are you crazy? You act as if you had just escaped from a lunatic asylum."

"Crazy! yes; crazy from joy. Congratulate me, my dear fellow; congratulate me!"

"But what on?"
"My great invention. I will revolutionize photography and make it as profitable in the west as anywhere else. One year from now I will reside in palace, marble front, sides and back, gold and silver—"

"But you have not explained."
"Do you see these?"

"I see a pair of very dainty little shoes, small enough for a Cinderella."

"Exactly. Well, my invention consists in a trap door for the floor of a photograph gallery right in front of the chair."

"What has that to do with the shoes?"
"Can't you see? When western belles want their photographs taken they slip those pretty little shoes under the edge of the dress so they look like their own."

"But what do they do with their feet?"

"Poke 'em through the trap door. There's millions in it."

The newest thing in vases now is made of a lady's shoe, gilded and decorated. A Chicago girl made one that way, and set it in the corner to dry. The hired lady dumped for bushels of coal into it and left, because, she said, it was only a trap to get her to fill the cellar with the winter's fuel.—[Merchant Traveler.]

That Cowboy.

The boy Self, mention of whose arrest for stealing a cow was made in Saturday's HERALD, was up before Justice Speirs yesterday afternoon. After hearing the testimony, which corroborated the statements we published, the boy was bound over in the sum of \$300 to await the action of the Grand Jury. Failing to obtain surety, he was remanded to the custody of the Marshal.

A Parisian doctor prescribed for a lady who had objections for growing stout: "Take exercise my dear lady. Consider the trees of the field; they never take exercise, and as a consequence they go on growing bigger and bigger every year."—[Boston Transcript.]
